31/07/09	£390,762.93	78053%	£168,210.63	£16,821.06

## Terms of Use

The system contained in this ebook, and the PDF it is contained in is **FREE** to distribute to friends, family, and around the internet, or if you run your own web site, you may offer the ebooks as freebies on the understanding that the ebook is not edited in any way, and is passed on as is.

In order to **MAXIMISE** profits from this system you need to use a betting exchange. Due to the high liquidity available on [Betfair](#) that is the one I use most of the time. If you already have a [Betfair](#) account I recommend opening a new one for Win2Win Racing systems so you do not affect profits from other forms of gambling.

[Click Here to Open a Betfair Account and Claim a Free Bet\\*](#)

You may also want an account with the 2<sup>nd</sup> best betting exchange, [Betdaq](#), and to be honest it is worth having in case of any server issues with the Betfair site.

[Click Here to Open a Betdaq Account](#)

And finally, in order to get the best prices for odds-on horses it is often worth comparing the betting exchanges with a bookmaker, and sometimes the bookie will offer a better price, and all those extra points you pick up add to the overall profits. [BET365](#) is one of the bookmakers who often offers better prices for odds-on shots.

[Click Here to Open a BET365 Account](#)

*\*Free bets usually range from £10-£25 and change over time. You can have as many Betfair accounts as you like.*

## Introduction

Hi, and thank you for downloading this system. It should provide you with years of profit as long as you stick strictly to the rules, although as with all gambling, this cannot be guaranteed, but spreading risk over a number of systems is one of the best ways to secure betting banks. Please be aware that the first 2 years of any system are usually just based on building the bank, and will not produce any income. I also recommend never starting any betting with a bank of more than £500. Once it has proven as a long term money maker you can add to the bank, and therefore increase overall stakes.

I have been a full time professional gambler on UK horse racing since 1998, and have helped other punters improve their returns for over a decade now. This system is designed to help you learn how systems work, how to handle bank management and staking, and cope with losing runs, which statistically happen more times than winning runs.

If you have not visited my web site; [Win2Win Racing](#) , then I suggest you put that at the top of your 'sites to visit' list. You will find free profitable win and lay selections, systems, staking, as well as a free and very active forum at <http://www.win2win.co.uk/forum/forum.php> . Registration is free. If you have any questions about this system, please do not hesitate to ask on the forum.

## The System

I have made profits from systems for years, and now have over 100 live win systems currently running in my portfolio, so offering this one free on the open market will not leave me missing any sleep. Some people wonder why I run so many, spreading the risk is key to profiting successfully in any financial dealings.

As this system has proved itself for years, and the way it selects the qualifiers it is unlikely to see a reduction in profits regardless of how many people use it. Although history proves that the majority will have given up within the first year as they are not making £££Millions, something that will not happen with any system/method betting when you are starting out. I started with £200 back in 1998, and now think nothing of placing 4 figure bets.

First of all I recommend using a [Betfair](#) account, as you will make **AT LEAST 10%** more profit over the long term than with a normal bookmaker. If you do not have one [CLICK HERE](#) and you will also get a **Free** introduction bet.

If you do not use a betting exchange, you are throwing money away that is supposed to be yours, and it can mean the difference between making a profit on a system & making a **VERY GOOD** profit on a system. Full instructions on how to use [Betfair](#) are on the web site, but you can check my forum for answers to any questions.

If you already have an account, you can open another account and use a separate debit/credit card, or use Paypal or bank transfer, that way you can collect the **Free Bet** again. You can run all Win2Win systems from the one account, but keep the betting banks separate either by using the old pen & paper, or a spreadsheet. I prefer to use separate accounts altogether for win & lay bets.

I have tried to include all the information & help I can think of, but if you need to question something please use the forum, do not email me.

If you use the [System Manager software](#) to manage your balance and staking, it will add additional protection to your bank, and make keeping track of everything easier. All systems work on horse racing in England, Scotland & Wales. They have not been tested on racing in any other countries, but you can always paper trade for a few months to find out for yourself.

## **The Results Graphs/Spreadsheets & Downloads**

I have now added graphs to each system on the spreadsheet. Please be aware that each time you change a variable, it has to recalculate a new graph, and make take a minute on some systems.

The graphs will allow you to see clearly what happens with the bank over 5 year, some are smooth, and others are very erratic, sometimes getting close to the original bank starting value. This is not a problem, and you should be using the free System Manager software I supply, as the graph may drop, but your actual money will be protected by the Bank Barrier, so deep troughs will not hit you.

You can also work out which variables are likely to give you the best return for the smoothest ride, and so will give you some comfort for the future.

As you can see by some of the graphs, a big drop from a bank high is natural when gambling, and usually is a correction after a very good run, as the SR will always level out over the year. When looking at some of the dips, and were betting it live, would you have bailed out thinking the system was broke? The vast majority do, those folk do not understand how statistics work in betting, and will probably always make a loss looking for that non-stop quick buck.

If you do not have the spreadsheet results for this system you can **DOWNLOAD** them now. You need either [Microsoft Excel](#) ( preferred) or [Open Office](#) (which is free).

[Download in XLSX Format](#)

[Download in XLS Format](#)

[Download both in compressed RAR Format](#)

## NH FREE WIN SYSTEM – SR 49% - ROI 8%

Although the rules may seem a little complicated at first, as it does with most systems, after a few days you will be whizzing through them. Most races can be voided leaving only a few to run all the rules on.

RULES	EXPLANATION																																				
Must be a NH (National Hunt) Race.	The race title contains the word Chase, Hurdle, or NHF.																																				
Use only on the following NH racecourses: <b>DONCASTER</b> <b>FOLKESTONE</b> <b>HAYDOCK</b> <b>HEXHAM</b> <b>KEMPTON</b> <b>LEICESTER</b> <b>LINGFIELD</b> <b>NEWBURY</b> <b>PERTH</b> <b>SANDOWN</b> <b>SOUTHWELL</b> <b>TAUNTON</b> <b>WARWICK</b> <b>WETHERBY</b> <b>WORCESTER</b>	These tracks have proven to profit from these rules year after year.																																				
Must be a <b>NON-HANDICAP</b>	That is any race that does not include the word <b>HANDICAP</b> in the title.																																				
Horse age MUST be <b>3,4,5,6 or 7</b>	This ensures we are concentrating on possible improvers.																																				
Weight rank must be <b>1,2,3,4,5,6,7 or 8</b>	Top weight is always No.1 No.2 is based on the horse with the next LOWER weight, so you may have more than one horse for each Weight Rank. You may have a race with 10 runners, and only Weight Ranks of 1 & 2. That is fine, and actually the norm. <b>Example 1:</b> <table data-bbox="815 1361 1150 1592"> <tr><td><i>RANK 1</i></td><td><i>DOLBY</i></td><td><i>9-11</i></td></tr> <tr><td>“</td><td><i>SETUP</i></td><td><i>9-11</i></td></tr> <tr><td>“</td><td><i>MINSET</i></td><td><i>9-11</i></td></tr> <tr><td><i>RANK 2</i></td><td><i>WALLY</i></td><td><i>9-7</i></td></tr> <tr><td>“</td><td><i>DEBSIN</i></td><td><i>9-7</i></td></tr> <tr><td><i>RANK 3</i></td><td><i>MRSSUN</i></td><td><i>8-6</i></td></tr> </table> <b>Example 2:</b> <table data-bbox="815 1664 1150 1888"> <tr><td><i>RANK 1</i></td><td><i>DOLBY</i></td><td><i>9-11</i></td></tr> <tr><td><i>RANK 2</i></td><td><i>SETUP</i></td><td><i>9-10</i></td></tr> <tr><td><i>RANK 3</i></td><td><i>MINSET</i></td><td><i>9-8</i></td></tr> <tr><td><i>RANK 4</i></td><td><i>WALLY</i></td><td><i>9-7</i></td></tr> <tr><td><i>RANK 5</i></td><td><i>DEBSIN</i></td><td><i>8-6</i></td></tr> <tr><td><i>RANK 5</i></td><td><i>MRSSUN</i></td><td><i>8-6</i></td></tr> </table>	<i>RANK 1</i>	<i>DOLBY</i>	<i>9-11</i>	“	<i>SETUP</i>	<i>9-11</i>	“	<i>MINSET</i>	<i>9-11</i>	<i>RANK 2</i>	<i>WALLY</i>	<i>9-7</i>	“	<i>DEBSIN</i>	<i>9-7</i>	<i>RANK 3</i>	<i>MRSSUN</i>	<i>8-6</i>	<i>RANK 1</i>	<i>DOLBY</i>	<i>9-11</i>	<i>RANK 2</i>	<i>SETUP</i>	<i>9-10</i>	<i>RANK 3</i>	<i>MINSET</i>	<i>9-8</i>	<i>RANK 4</i>	<i>WALLY</i>	<i>9-7</i>	<i>RANK 5</i>	<i>DEBSIN</i>	<i>8-6</i>	<i>RANK 5</i>	<i>MRSSUN</i>	<i>8-6</i>
<i>RANK 1</i>	<i>DOLBY</i>	<i>9-11</i>																																			
“	<i>SETUP</i>	<i>9-11</i>																																			
“	<i>MINSET</i>	<i>9-11</i>																																			
<i>RANK 2</i>	<i>WALLY</i>	<i>9-7</i>																																			
“	<i>DEBSIN</i>	<i>9-7</i>																																			
<i>RANK 3</i>	<i>MRSSUN</i>	<i>8-6</i>																																			
<i>RANK 1</i>	<i>DOLBY</i>	<i>9-11</i>																																			
<i>RANK 2</i>	<i>SETUP</i>	<i>9-10</i>																																			
<i>RANK 3</i>	<i>MINSET</i>	<i>9-8</i>																																			
<i>RANK 4</i>	<i>WALLY</i>	<i>9-7</i>																																			
<i>RANK 5</i>	<i>DEBSIN</i>	<i>8-6</i>																																			
<i>RANK 5</i>	<i>MRSSUN</i>	<i>8-6</i>																																			
Continued on next page.....	Continued on next page.....																																				

<p>Finishing position 2 runs ago must be <b>1,2,3,4...7...12...etc</b>, including any that <b>failed to finish</b>.</p>	<p>Ignore all horses that have never run under NH rules and those that have raced only once. Ignore all international form other than UK or Irish.</p> <p><b>Example 1:</b>  <i>These would qualify:</i>  <b>0900</b>  <b>FF</b>  <b>P0</b>  <b>U1</b>  <b>11F1</b>  <b>9F13</b></p> <p><i>These would not:</i>  <b>-</b>  <b>0</b>  <b>F</b>  <b>6</b></p> <p>So the horse must have run at least twice under NH rules.</p>
<p>Horse sex must be:  <b>FILLY</b>  <b>COLT</b>  <b>HORSE</b>  <b>GELDING</b></p>	<p>You can easily get this information from the Racing Post site. Ignore Mares.</p>
<p>Has to be the <b>LIKELY FAVOURITE</b></p>	<p>This is the shortest price horse listed with the bookmaker, or betting exchange just before the Off. Can be a Joint Favourite.</p> <p>I advise running this final rule as close to the OFF as possible. If you have to place the bets early use the forecast favourite from <u>Betfair</u>. Do not use newspaper forecast odds. Occasionally you may back the wrong horse due to late price changes, over the long term this will make little difference.</p>

## Past Stats

As this is a free system, results for years after 2009 will not be updated, but it should continue to produce profits. LSP is the profit column.

YEAR	WINS	RUNS	STRIKE%	LSP	LSP%	VSP%
2001	130	274	47.45	12.49	4.56	0.36
2002	172	305	56.39	45.68	14.98	11.15
2003	148	295	50.17	22.11	7.49	6.24
2004	156	343	45.48	26.40	7.70	4.35
2005	135	300	45.00	14.65	4.88	7.66
2006	154	307	50.16	11.25	3.66	-0.26
2007	139	313	44.41	-3.89	-1.24	-0.85
2008	181	339	53.39	69.24	20.42	8.53
2009	18	39	46.15	2.31	5.92	-3.19
<hr/>						
	1233	2515	49.03	200.24	7.96	4.66

*Although 2007 showed a small loss, this was actually turned into a reasonable profit using Betfair.*

LSP – Level Stake Profit. This is how much you would win if you placed £1 on each horse. The higher the number, the more profit that season. This is based on SP, so exchange profits would be higher.

LSP% – How much you would win per £ bet. Otherwise known as ROI% (Return On Investment).

VSP% – How much you would win if you backed every qualifier to WIN £1, not as important as LSP%.

## **Staking & Bank Management**

Apart from selecting profitable horses, whether backing or laying, you need to have the correct staking plan and betting bank in place. This is where many people go wrong, and end up losing, even if the system is profitable long term. They then blame the system rather than themselves.

I recommend using a starting bank of £100 Minimum and £500 Maximum, but obviously you can adjust it if you want to go bigger or smaller. The reason I say this is that any mistakes you make in the beginning will not cost you so much. I still make the odd mistake myself, except they tend to cost me at least a few hundred quid, so I keep them to a minimum!

Do not run 'fun bets' on any accounts you are running these systems on. In fact, stop doing fun bets. If this is difficult, do them in a separate account, and write down EVERY bet. You soon get bored when you realise how much you are actually losing, and the losses may cancel out any profits from this system.

## **WIN Staking**

*The staking plan is simple;*

- Use a **FIXED STAKE** of 3% of your bank, adjusted after each race **OR** daily.

So if you take £200 starting bank as an example, 3% of that is £6. This may not sound much, but trust me, I have been making money from gambling for years and know what I am doing, and this is an easy to follow staking plan that works well, and it soon builds up in a few months. So if your bank was £420, 3% of that would be £12.60, so your stake would be £12.60.

You should **NEVER** bet more than 3% of your bank, as you not only increase risk, but you will lower the ROI%, so you'll be risking more, to win less!! (Try a 15% stake in the spreadsheet 0.15...Ouch!!).

Once you have been doing these for a few months, there is nothing to stop you depositing additional money in the betting bank. This will help build up your investment more quickly.

You **DO NOT** need to keep notes of every qualifying horse, but you must at the very least keep notes on the daily Profit/Loss and winners/losers so you can work out what stake to use for individual bets.

Over time as your bank builds up, decrease the stake percentage by 0.1% at a time. By doing this, you add in more security to your bank, so eventually if you ever get down to a stake of 1% of the bank, any losing runs will prove insignificant.

## Staking Notes

One problem for beginners who are using the betting exchanges is the 5% commission, so the sooner you get a reduction in it the more profit you will make. The only way to do this is to win money, but don't try and speed the process up; it will come down over time. Just remember that the more profit you make, the lower your commission will get. ☺

Obviously if you use a bookmaker you do not pay commission, but then you do not get the additional % bonus on the prices, and this can cost you £1,000's over the years in lost profit. You can see the effect of this by putting in the value '0.00' in the SP+Overbet on the spreadsheet. The only time you may want to use a bookmaker instead is when a horse is odd-on.

Remember that any system, back or lay is for the long term; you cannot judge it on a daily/weekly basis. I judge performance in quarters (3 months) for everything I do, anything less does not show the complete trends.

You are now ready to go about using the systems. You will soon remember the rules, and have a selection in a few minutes, if not seconds. Some days you may have no selections, other days quite a few, this is normal.

Stick to the rules, the staking plan, and the bank management, and you have the potential to make good money from these over the coming years. Start thinking you know better, fiddle with the rules, or stake too high, and you may bust the bank, even though the system itself is still producing profits for everyone else!

Some people may lose a bank when starting out; this does not mean a system is 'broke', but that you were unlucky to start due a very bad statistical run, this does happen, and has happened to me in the past with other systems, I always allow 3 banks to go bust before scrapping a system. Most people pack it in at this point.....and miss the upturn by starting again!

## Q&A

### **Can I use these systems on NH racing?**

Yes. The systems are designed only for UK NH racing, and not for flat turf or AW, and will lose you money if you tried to bend the rules.

### **What happens if more than one qualifies?**

This should rarely happen, but when it does you back all qualifiers for the same stake you would use if you just had one qualifier.

### **Is Betdaq OK to use?**

Betdaq is fine, but if you want to get decent bets on use [Betfair](#).

### **I have just been paid a £200 bonus at work; can I add this to my betting bank?**

Of course. In fact the more you can get into the betting bank, the more profit you will have made at the end of each year. However, it is best not to do this if you have just started. Let the original bank roll for the first few months and prove that it is making a profit.

### **I notice that after a few years the stakes get much larger, are they difficult to get on?**

If you are reducing the stakes to protect the bank, and withdrawing profits as income, your stakes should always remain manageable. You will not have any problem getting a few grand on the exchanges as it will be quite happily snapped up by traders. £10,000 on the first few in the betting will easily vanish. But stakes shouldn't get that high if you are taking money out of the banks, and it is always best to limit maximum bets to around £2000.

### **If the qualifier is a non runner do I review the race again?**

In most cases yes, but only a small number will be affected so if you cannot check before the race, never check before the race. Stay consistent.

### **I had to use a bookmaker today for the Win bets, instead of the exchanges, does this make a difference?**

If it was a profitable day then it will impact the long term profits if you do it on a regular basis. If you use the spreadsheet supplied and check it with no overbet percentage, this is the SP results, and will show you the long term difference between the exchange and bookmaker profits. If it only occasionally then it will make little difference.

### **I have started the Win systems, and had 10 losers in a row, is it broke?**

Statistics say you could have 10 losers in a row, especially on systems with a low SR, but then you can also hit over 6 winners in a row. Some people will start on a good run, some on a bad, just follow the rules and it will average out over the long term. Remember though, you are statistically likely to start on a losing run.

### **My bookmaker has banned me?**

Use the exchanges; with a bookmaker you are making smaller profits anyway.

**I made a mistake and bet the wrong horse?** Just put the same stake on the opposite bet (Lay), that will cancel it out, you can only do this on a betting exchange though, but can use this method to cancel an incorrect bookmaker bet. You may lose a little bit of money in the price difference. You can only do this on a betting exchange.

**I bet a horse that I just noticed is not a qualifier?** Again, just cancel the bet as above if you done it on the exchanges.

**I know it is early days, but how much income would be the limit to take out each year?** I would not take out over 20%, any more and you will stomp bank growth, especially in the early days.

### **Do these systems work in Ireland?**

I have no way of checking if they work in other countries. You can always paper trade them for a few months but I doubt they will be profitable.

**I have to do these the night before and cannot check for non-runners or which is the likely favourite.**

Just pick which horses qualify and back the FAV option with a bookmaker.

**I'm off on holiday for 2 weeks, will this damage my profits?**

It may do, then again it may help them. No one knows, and don't bother checking the results when you return, what you don't know can't hurt!

**I started a system 3 months ago, and I am still not showing a profit.** This may be the case as all systems hit periods of being stagnant. Check the graphs on the spreadsheets to give you an idea of what you may expect over time.

**Do I have to do the Rules in the order given?**

Not really, you may find a quicker way.

**How are lower SR systems more profitable than say a 50% SR one?** SR always has a relation to average price. A 50% SR means if you average odds of 1/1 you will break even with a bookmaker, so to show a profit you need to average 11/10+. Now if you have a 19% system, you would be looking for say 6/1 to profit, but you will probably find the average is higher if it is a profitable system. If you use the exchanges, you should then easily be able to push up the average to 7/1, giving you more profits, and a nice advantage over those that use the bookmakers. The overbet on these systems is you are getting the best prices can be 20%+. Put that figure in the graph and see the difference it makes, compared to 5%.

**I have another question?** Please visit the [Win2Win Racing Forum](#) , and ask on there, do not email me, I'm busy on the forum!

*\*\*A quick note on tax. Although gambling winnings are not taxable, you must declare any profits you withdraw for personal use, so always take a screen print of the withdrawal/statement page on Betfair, or your bookmaker and file it. You do not need to do this for day to day, withdrawal/deposits, and only need bother if you are making a few grand a month.*
